Interview Summary

Status of application: Applicant filed an RCE on 10/31/06.

In this examiner-initiated interview, the following amendments were suggested to make the application in condition for allowance.

Amend claim 21 as follows:

- (1) Replace: "~~a portion of selected ones~~" with - - at least a portion of some of - -
- (2) Replace: "~~metal precipitated with counter ion of a cationic material~~" with - - silver amine halide of diallyl dimethyl ammonium halide homopolymer - -
- (3) Delete: "~~selected one of said~~"

Claims 22, 23 and 31, all depending from claim 21, can be rejoined; all the remaining pending claims must be cancelled for allowance.

The suggested amendments would overcome some new matter issues in the claims and the specific biological interception agent would overcome the prior arts. Claims language such as "selected ones of fibrillated fibers", and "carbonized, fibrillated fibers ... having Canadian Standard freeness ..." are new matter. Specification does not support 'selected one of fibrillated fibers'. The Canadian Standard Freeness is disclosed only for fibrillated fibers before carbonizing; such fibers may not exhibit the same Canadian Standard Freeness after carbonizing.

Art Unit: 1723

In response to this suggestion, Mr. Robert Curcio, attorney of record, requested a written summary by fax to further discuss the matter with the applicant, and a couple of days for preparing a response.
